Quality Manager (m/f/d) in Medical Technology full-time

EPflex is one of the world's leading manufacturers of metallic components for minimally invasive medicine. With numerous patents and innovations, we rank among the pioneers in our industry. With around 420 employees, we want to contribute with our ideas and products to safeguarding the health of people all over the world and also support the treatment of COVID-19 patients.

YOUR TASKS

- Continuous monitoring, maintenance and further development of our processes in the QM system in conjunction with the process owners
- Implementation of future-oriented QM projects (including the introduction of a new documentation system and new QM tools)
- Introduction and establishment of a company-wide process for the evaluation of QM processes
- Collaboration on the introduction of company-wide process indicators
- Collaboration and implementation of quality audits within the scope of our audit program
- Preparation of QM-relevant evaluations / statistics

YOUR PROFILE

- Successfully completed studies (e.g. medical technology or quality management) or successfully completed further training as a state-certified technician (m/f/d)
- Relevant professional experience or basic or advanced training in the field of quality assurance/management (especially DIN EN ISO 13485)
- Knowledge of current standards and regulations is an advantage
- Good command of written and spoken English
- A careful and conscientious way of working
- Strong communication and teamwork skills
