Design Engineer Plant Construction (m/f/d) full time

EPflex is one of the world's most important manufacturers of metallic components for minimally invasive medicine. With numerous patents and innovations, we are among the pioneers in our industry. With around 400 employees, we push the boundaries of minimally invasive surgery every day. For patients, this means shorter procedures, less pain and faster recovery.

YOUR TASKS

- Design of mechanical components, assemblies, plants and equipment
- Elaboration of constructive solutions and drafts for plant construction via the CAD system Solid Works (in close coordination with the technical departments)
- Commissioning and coordination of external service providers and suppliers
- Consulting function and support in the installation and commissioning of operating and auxiliary equipment
- Preparation of technical documents and documentation

YOUR PROFILE

- Completed training as state-certified technician/ technical product designer or
- completed studies in the fields of plant and mechanical engineering, equipment construction or process engineering
- Professional experience in the design of complex assemblies and initial experience with PDM and ERP systems desirable
- Good knowledge of Solid Works (CAD)
- Ability to work in a team, independence, flexibility and commitment
