Technical product designer (m/f/d) full time

EPflex is one of the world's most important manufacturers of metallic components for minimally invasive medicine. With numerous patents and innovations, we are among the pioneers in our industry. With around 400 employees, we push the boundaries of minimally invasive surgery every day. For patients, this means shorter procedures, less pain and faster recovery.

YOUR TASKS

- Creation of standard and production-compliant drawings
- Design of mechanical components, assemblies, systems and equipment
- Creation and maintenance of master data in the PDM or ERP system
- Support and implementation of change requests in consultation with the responsible design engineers and project managers
- Design and optimization of components and assemblies

YOUR PROFILE

- Completed training as a technical product designer, state-certified technician or
- completed studies in the fields of plant and mechanical engineering, equipment construction or process engineering or comparable qualification
- Confident handling of CAD, ideally Solid Works
- First experience in using a PDM and ERP system
- Ability to work in a team, independence, flexibility and commitment
